

Jack Hart

Jack.Hart@ticrail.com.au

"Combining practical rail infrastructure experience with technical training to build a safe, capable and competent rail workforce."

Background

Jack is an experienced Rail Infrastructure Trainer and Assessor with 14 years' rail industry experience across operational infrastructure and technical training roles. His career has included track maintenance, track inspection/certification, supervising and training, providing him with strong practical industry knowledge and a firsthand understanding of the standards, procedures and competency requirements applied in the field.

Jack brings that operational experience directly into the training environment, helping participants connect technical requirements with real on-track application. His focus is on developing competent rail workers who understand not only what is required, but how and why it is applied.

Having worked across rail operators, major contractors and Registered Training Organisations, Jack understands the different operational demands faced across the industry. This range of experience allows him to engage effectively with both experienced rail workers and those developing new competencies, creating a practical and supportive training environment while maintaining a strong focus on safety, application and industry compliance.

Experience
