

Jamie Schoer

jamie.schoer@ticrail.com.au

Background

Jamie Schoer is a highly experienced rail industry professional with over 30 years of operational, safeworking and training expertise across major Australian rail networks. With comprehensive qualifications in all ARTC and UGLRL safeworking systems, Jamie brings extensive knowledge of rail operations, planning, and protection requirements across complex and high-pressure environments.

Throughout his career, Jamie has demonstrated strong leadership in safeworking, protection planning, and operational logistics. His early experience in multiple signal boxes and as an Area Controller at the Broadmeadow Train Control Centre provided him with in-depth understanding of train control operations, graphing procedures, and network coordination. This operational foundation has enabled him to effectively manage rail possessions, major worksites, and closedown activities across diverse projects and geographic locations.

Since 2020, Jamie has served as a Trainer and Assessor with the Centre for Excellence in Rail Training, delivering TFNSW Safely Access the Rail Corridor, ARTC and UGLRL safeworking training and recertifications, communication protocols (including NTS, WOTA, ETW, ETWV and ETAP), Dangerous Goods, Load Restraint, Fire Extinguisher training, and core rail competencies. He also contributes to quality assurance processes, developing and refining training materials to ensure compliance with current rail standards.
