

Stephen Moy

stephen.moy@ticrail.com.au

Background

Steve Moy is an experienced rail construction and maintenance professional with a diverse background spanning track operations, workforce training, and multi-industry site management. His career reflects a strong commitment to operational safety, high-performance delivery, and the development of workforce capability across demanding physical environments.

In his current role, Steve is responsible for contributing to rail construction and maintenance operations, drawing on a wealth of hands-on experience gained across a broad range of industries and site conditions.

His background as a qualified Trainer and Assessor has developed strong capability in instructional delivery, workforce development, and compliance oversight, enabling him to operate effectively across both frontline and supervisory functions. A solid management foundation, combined with well-developed communication skills, allows Steve to engage confidently with individuals at all levels of technical understanding and contribute meaningfully to team performance and continuous improvement.
